COMPANY PROFILE

Prime Bitumen Limited

We supply paving-grade bitumen, cationic and anionic emulsions, cutbacks and polymer-modified bitumen from our base in Colfax Industrial Area, Bonje, Mombasa, Kenya.

Our experience

Our team has 12 years of experience in the Kenyan market. Prime Bitumen Limited focuses on bituminous products, built on that experience.

Mission and vision

Mission. To supply consistent, specification-grade bituminous products that help build durable roads, delivered on time and backed by hands-on technical support.

Vision. To be the most trusted bitumen supplier in Kenya and the region, known for quality, reliability and honest service.

Products

Category / grade	Typical use
Bitumen	
Bitumen 60/70	Paving-grade bitumen for hot-mix asphalt and general road construction.
Bitumen 80/100	Softer paving grade suited to cooler climates and base layers.
Cationic Bitumen Emulsions	
K1-40	Cationic spray emulsion (about 40% bitumen) for fog seals, dust control and light prime coats.
K1-60	Cationic rapid-setting emulsion (60% bitumen) for tack coats and surface treatments.
K1-70	Cationic rapid-setting emulsion (70% bitumen) for chip seals and heavy-duty tack coats.
K3-65	Cationic stable-mix emulsion (about 65% bitumen) for cold mixes, stabilisation and recycling.
Anionic Bitumen Emulsions	

Category / grade	Typical use
A4-60	Anionic stable-mix emulsion (about 60% bitumen) for cold mixes and stabilisation.
Cutbacks	
MC-30	Medium-curing cutback for prime coats on granular bases.
MC-70	Medium-curing cutback for prime coats and cold-mix applications.
MC-3000	High-viscosity cutback for road mixing, patching and stabilised bases.
Polymer Modified Bitumen	
PMB	Polymer-modified bitumen for highways, heavy traffic and high temperatures.

What we stand for

Quality. Every shipment is tested and comes with a certificate of analysis.

Reliability. Clear quotes, agreed delivery dates and a team that answers the phone.

Support. Advice on choosing the right grade for your base, climate and traffic.
